

MVP - Minimum Viable Product

- * Get target score 19 - 120
- * Get four crystals valued between 1-12
- * Generate a user score
- * When crystal clicked - adds to user score
- * Compare to target score

PSEUDO-CODE

```
var target = math.floor(math.random * Google This) between 19-120

var crystal1 = same as above but between 1-12
var crystal2 = ^^
var crystal3 = ^^ [you can push random numbers into an array]
var crystal4 = ^^

var userScore = 0

$("#crystal").on("click", updateScore);

var updateScore = function(){
  $(this).val();
};
-----
Option:
var crystalArr = [13, 9, 4, 7]

var id = $(this).data("num"); - needs to be parsed
userScore += crystalArr[id]

Option:
$("#crystal1").data(num, crystal1);
-----
var updateScore = function(){
  var num = $(this). <-- to access associated # - number GOOGLE
  userScore += num
  if (userScore > targetScore){
    display ("lose"); GOOGLE
  }
  else if (userScore === targetScore){
    display ("winner");
  }
};
```
